WORK EXPERIENCE

Fortune Pay Fintech Inc. (Easypay Global EMI Corp) **Aug 2025 – Present**

Full Stack Developer

- Built a mobile KYC verification workflow in Flutter (GetX) using Google ML Kit for on-device face detection and facial matching against submitted ID documents, implementing fast and regular verification feature to streamline identity checks and reduce customer support's manual review workload
- Built the reward points module for an internal admin portal using Spring Boot and Microsoft SQL Server, implementing paginated, filterable point history endpoints and a one-year expiry policy for unclaimed points.
- Contributed to the DSWD Ayuda project by integrating and testing using Postman a disbursement API, implementing API requests and response handling, validating transaction data, and supporting the secure, reliable, and efficient processing of client fund disbursements
- Executed automated testing using Jest and participated in CI/CD pipelines with GitLab CI and Jenkins to validate application changes before release.
- Independently designed and developed the company website using Next.js, MongoDB, and Tailwind, implementing responsive UI, database integration, and scalable web architecture. Deployed and managed the application using Vercel.

Quezon City Academy Foundation **Jul 2025 - Sep 2025**

Freelance Developer

- Developed a School Equipment Borrowing System for Quezon City Academy Foundation. The system allowed staff and students to request and track tool loans efficiently using PHP, Bootstrap, jQuery, AJAX, MySQL.
- Enabled real-time tracking and management of borrowed tools by integrating REST API with jQuery AJAX, reducing manual paperwork and improving accountability.
- Created an organized and searchable equipment database to enhance resource management and utilization.

Rizal Technological University **Apr 2025 - Jul 2025**

Freelance Developer

- Developed an Individual Performance Commitment and Review (IPCR) system using Next.js, MongoDB, and ShadCN, digitizing performance evaluation workflows and reducing manual workload for employees, HR, and administrators.
- Implemented interactive data visualization dashboards using Chart.js to improve performance tracking, reporting, and eliminate manual tallying of IPCR records.
- Integrates Nodemailer to send email notifications whenever IPCR records are submitted, reviewed, approved, or updated.
- Implements secure login, protected pages, and server-side authorization to safeguard sensitive employee information.

EDUCATION

AMA University | Bachelor of Science in Information Technology **2021 - 2025**

- Taguig Scholar (2021 - 2025)
- Dean’s Lister (2020–2023)
- Led the back-end development team for AppCon 2023 Philippines, contributing to an AI-powered flood monitoring and disaster preparedness application

CERTIFICATES

JavaScript 1 ES6 | JavaScript 2 ES6 | CCNA: Enterprise Networking, Security & Automation | DevNet Associate | Anti-Money Laundering and Counter-Terrorism Financing | CCNAv7: Switching, Routing, and Wireless Essentials
