PROFILE

Full-Stack Developer with experience building secure, scalable web applications and fintech solutions. Experienced in full-stack development, payment gateway and API integration, and testing web and mobile applications to ensure reliable, high-quality software. Also deliver custom web solutions as a freelance developer, translating business requirements into efficient digital products.

WORK EXPERIENCE

Fortune Pay Fintech Inc.

2026 - PRESENT

Full-Stack Developer

- Developed a mobile KYC verification solution using React Native and Google ML Kit, an AI-powered face detection and facial matching to validate user identity against submitted identification documents.
- Developed an internal portal for monitoring payment transactions and user reward points, improving operational visibility and reporting using Next.JS and MongoDB (ODM).
- Executed automated testing using Jest and participated in CI/CD pipelines with GitLab CI and Jenkins to validate application changes before release.
- Independently designed and developed the company website using Next.js, MongoDB, and Tailwind, implementing responsive UI, database integration, and scalable web architecture. Deployed and managed the application using Vercel.

Rizal Technological University

APR 2025 - JUL 2025

Freelance Full-Stack Developer

- Developed an Individual Performance Commitment and Review (IPCR) system using Next.js, MongoDB, and ShadCN, digitizing performance evaluation workflows and reducing manual workload for employees, HR, and administrators.
- Implemented interactive data visualization dashboards using Chart.js to improve performance tracking, reporting, and eliminate manual tallying of IPCR records.
- Improved overall equipment utilization by providing an organized and searchable database of available tools.

Quezon City Academy Foundation

JUL 2025 - SEP 2025

Freelance Developer

- Developed a School Equipment Borrowing System for Quezon City Academy Foundation. The system allowed staff and students to request and track tool loans efficiently using PHP, Bootstrap, jQuery, AJAX, MySQL.
- Enabled real-time tracking and management of borrowed tools by integrating REST API with jQuery AJAX, reducing manual paperwork and improving accountability.
- Created an organized and searchable equipment database to enhance resource management and utilization.
